## SUMMARY

---

Pre-final year Computer Science student with strong expertise in modern frontend technologies. Passionate about building responsive, user-friendly web interfaces and translating design into clean, efficient code. Eager to contribute to impactful frontend projects in a collaborative environment.

## EDUCATION

---

**Bachelor of Technology in Computer Science and Engineering**, University of Lucknow (GPA: 7.21) Aug '22 — Present

## SKILLS

---

**Language** HTML5, CSS3, Javascript, C, Java

**Framework** React.js, Node.js, Express.js

**Tools and Technologies** Git, Github, VS Code, Terminal, MongoDB, Render, POSTMAN, Material UI, Resend, Tailwind CSS

**Core Skills** Data Structure and Algorithms (DSA), Object Oriented Programming (OOPS)

## PROJECTS

---

### Smart Medicine Reminder Web App [Link](#)

- Used HTML, CSS, Javascript, React JS, Node JS. Express JS, MongoDB, Amazon AWS, Render, Vercel, Material UI
- Integrated web push notifications and automated scheduled email reminders using cron jobs, resulting in 3000+ users can receive personalized updates and reminders on a weekly basis.
- Used JWT-based authentication system with secure login/register functionality.

### My Portfolio [Link](#)

- Built and deployed a personal portfolio using React to highlight core web development skills and professional projects.
- Showcases a range of full stack and frontend projects demonstrating practical problem-solving, responsive design, and technical proficiency.
- Includes links to source code, live demos, and detailed descriptions of features and technologies used.

### Weather App [Link](#)

- Used HTML | CSS | JavaScript | OpenWeatherMap API | React JS
- Designed and deployed a user-friendly interface for the weather applications, enabling 500 + users to easily access and visualize real-time weather information with high usability.
- Demonstrated use of asynchronous JavaScript and API error handling.

## CERIFICATIONS AND ACHIEVEMENTS

---

### [The complete Web Developer Course 3.0](#)

Udemy

Apr '25

- The Complete Web Developer Course 3.0 by Rob Percival at Udemy.
- Developed and deployed two full-stack web projects including a weather app and a smart medicine reminder app using modern UI, API integration, and authentication.
- Hosted personal projects with custom domains and GitHub Pages, showcasing practical deployment and version control skills.
